This study aims to determine: 1) the effect of product quality, price, and product design simultaneously on interest in buying custom furniture, 2) the effect of product quality partially on the interest in buying custom furniture 3) the effect of price partially on the interest in buying custom furniture, 4) the effect of product design partially on the interest in buying custom furniture. The population of this study is the Millennial Generation which has an age range of 19 – 39 years. This sampling technique uses a non-probability sampling method with an accidental sampling technique. The sample of this research is 100 respondents who have an interest in buying custom furniture, and data collection is done through a questionnaire. The data analysis technique used in this study is descriptive analysis, classical assumption test, and multiple linear regression analysis using the IBM SPSS 23 application. The results of this study indicate that product quality, price, and product design simultaneously affect interest in buying custom furniture, product quality partially affects buying interest in custom furniture, price partially has no effect on interest in buying custom furniture, and product design partially has affected interest in buying custom furniture.
