This study aims to determine if: (1) Website quality, consumer trust, gamification simultaneously influence repurchase interest on the Shopee marketplace, (2) Website quality partially influences repurchase intention on the Shopee marketplace, (3) Consumer trust partial influences repurchase intention on the Shopee marketplace, (4) Gamification partially influences repurchase intention on the Shopee marketplace. The population in this study were all Shopee users in Yogyakarta City Region. The samples taken were 96 respondents. The sampling technique used is Non-Probability sampling, with the respondent criteria being Yogyakarta students who have made purchases and played games on the Shopee application more than once. Data analysis used SPSS 20. The results showed that: (1) Website quality, trust, gamification simultaneously had a significant influence on repurchase intention, (2) Website quality did not have a significant influence on repurchase intention, (3) Trust partially had a significant influence on repurchase intention, (4) Gamification partially had a significant influence on repurchase intention.

Keywords: Website Quality, Trust, Gamification, Repurchase Intention
