Penelitian ini bertujuan untuk: 1) mengetahui perbedaan tingkat agresivitas siswa laki – laki dan perempuan di sekolah pendidikan karakter; 2) mengetahui tingkat agresivitas siswa laki – laki di sekolah pendidikan karakter; 3) mengetahui tingkat agresivitas siswa perempuan di sekolah pendidikan karakter; 4) mengidentifikasi butir pengumpulan perilaku agresif apa saja yang capaian skornya tinggi di sekolah pendidikan karakter.

Penelitian menggunakan pendekatan kuantitatif dengan desain penelitian komparatif. Subjek penelitian sebanyak 200 siswa yang terdiri dari 100 siswa laki – laki dan 100 siswa perempuan, dengan populasi penelitian siswa kelas X, XI dan siswa XII SMK Penerbangan AAG Adisutjipto Yogyakarta. Tekni pengumpulan data menggunakan survei dan menggunakan pengukuran *Likert*. Proses pengambilan data via *google form* dan dilakukan dengan terjun kelapangan. Uji validitas menggunakan validitas isi dan validitas korelasi skor total. Hasil uji validitas didapati 41 item valid. Uji reliabilitas menggunakan proses perhitungan *Alfa Cronbach* dengan hasil 0,926, maka reliabilitas masuk kategori sangat tinggi. Selanjutnya uji perbedaan menggunakan uji-t (*independent sample t-test*).

Hasil penelitian: 1) didapati ada perbedaan perilaku agresif siswa laki – laki dan siswa perempuan, siswa laki – laki lebih agresif dibanding siswa perempuan; 2) didapati perilaku agresif siswa laki – laki dengan 3% kategori tinggi, 26% kategori sedang, 38% kategori rendah dan 33% kategori sangat rendah; 3) didapati perilaku agresif siswa perempuan dengan 1% kategori sangat tinggi, 5% kategori tinggi, 10% kategori sedang, 37% kategori rendah dan 47% kategori sangat rendah; 4) didapati 2 (5%) item perilaku agresif yang terindikasi tinggi dengan kategori sedang.

Kata kunci; agresivitas, agresif, siswa laki – laki, siswa perempuan, sekolah pendidikan karakter

ABSTRACT

THE DIFFERENCES IN STUDENT AGGRESSIVENESS LEVELS IN TERMS OF GENDER IN AAG AVIATION VOCATIONAL SENIOR HIGH SCHOOL YOGYAKARTA

This study aims to: 1) determine the difference in the level of aggressiveness of male and female students in character education schools; 2) determine the level of aggressiveness of male students in character education schools; 3) determine the level of aggressiveness of female students in character education schools; 4) identify what items of aggressive behaviour are classified as high in character education schools.

The study utilized a quantitative approach with a comparative research design. The research participants were 200 students which included 100 male students and 100 female students, with a research population of class X, XI and XII students of SMK Penerbangan AAG Adisucipto Yogyakarta. Data collection technique used a survey and used Likert measurements. The data collection process was via google form and jumped into the field. The validity test used content and total score correlation validity. The validity test result found 41 valid items out of 48 items. The reliability test used Cronbach's alpha calculation process with the result of 0.926, thus the reliability was in a very high category. Furthermore, the difference test used t-test (independent sample t-test).

Research results: 1) there were differences in the aggressive behaviour of male students and female students, male students were more aggressive than female students; 2) there were aggressive behaviour of male students with 3% high category, 26% medium category, 38% low category and 33% very low category; 3) there were aggressive behaviour of female students with 1% very high category, 5% high category, 10% medium category, 37% low category and 47% very low category; 4) there were 2 (5%) items of aggressive behaviour that were indicated as high with a medium category.

Keywords; agressiveness, aggressive, male students, female students, character education school
