

ABSTRAK

Skripsi ini berjudul: **“USAHA MENINGKATKAN PELAKSANAAN PEMBINAAN IMAN MANTAN PENDERITA KUSTA DI LINGKUNGAN SITANALA TANGERANG KEUSKUPAN AGUNG JAKARTA MELALUI KATEKESE MODEL *SHARED CHRISTIAN PRACTICE* (SCP)”**. Pemilihan judul ini bertitik tolak dari keprihatinan penulis terhadap pelaksanaan pembinaan iman mantan penderita kusta di lingkungan Sitanala Tangerang, Keuskupan Agung Jakarta. Menurut pengamatan penulis, pelaksanaan pembinaan iman di lingkungan Sitanala Tangerang ini kurang berjalan dengan baik. Hal ini disebabkan oleh keterampilan pembina yang kurang kreatif dan menarik sehingga pelaksanaan pembinaan iman mantan penderita kusta di lingkungan Sitanala terkesan kaku dan membosankan.

Permasalahan pokok skripsi ini bagaimana meningkatkan pelaksanaan pembinaan iman mantan penderita kusta di lingkungan Sitanala Tangerang agar sungguh-sungguh membantu mereka untuk mengembangkan imannya supaya semakin percaya diri, tidak minder dan tidak putus asa. Menanggapi permasalahan di atas, penulis menggunakan buku-buku dan sumber lain yang relevan serta diperkaya refleksi pribadi. Data mengenai pembinaan iman mantan penderita kusta diperoleh melalui pengamatan langsung dan wawancara oleh penulis. Hasil penelitian menunjukkan bahwa pelaksanaan pembinaan iman di lingkungan Sitanala Tangerang perlu ditingkatkan.

Maka, untuk dapat meningkatkan pelaksanaan pembinaan iman mantan penderita kusta di lingkungan Sitanala Tangerang, penulis mengusulkan program pembinaan iman dalam bentuk katekese model *Shared Christian Praxis* (SCP). Model ini dianggap cocok untuk pelaksanaan pembinaan iman mantan penderita kusta karena berdasarkan pengalaman hidup pribadi peserta. Dengan demikian, mantan penderita kusta diharapkan terbantu untuk menghayati imannya serta mewujudkan harapan mereka.

ABSTRACT

This thesis is entitled: " THE EFFORT TO IMPROVE FAITH FORMATION OF FORMER LEPROSY PATIENTS IN SITANALA TANGERANG IN THE ARCHDIOCESE OF JAKARTA THROUGH CATHECESIS MODEL OF SHARED CHRISTIAN PRAXIS (SCP)". This title is selected based on the concerns of the author towards the implementation of faith formation to the former leprosy patients in Tangerang Sitanala, Archdiocese of Jakarta. According to the writer's observation, the implementation of faith formation in Tangerang Sitanala environment is not improving. This is due to the skills of the catechist less creative and interesting so that the implementation of faith formation in the former leprosy patients Sitanala seems stiff and boring.

The main problem of this thesis is on how to improve the implementation of the guidance of former leprosy patients in Tangerang Sitanala environment so that it truly helps them to develop their faith in order to be more confident and more enthusiastic. Respond to those problems, the authors use books and other relevant sources as well as personal reflections. Data on the faith formation of former leprosy patients are obtained through direct observation and interviews by the author. The results showed that the implementation of faith formation in Tangerang Sitanala environment needs to be improved.

Thus, in order to improve the implementation of faith formation in the former leprosy patients Sitanala Tangerang, the author proposes a program of faith formation in the form of catechesis models of Shared Christian Praxis (SCP). This model is considered suitable for the implementation of faith formation for former leprosy patients since it is based on personal life experiences of the participants. Thus, the former leprosy patients are expected to live their faith and to realize their hope.
