

## ABSTRAK

### HUBUNGAN BIAYA PENDIDIKAN, CITRA PROGRAM STUDI, INTERAKSI TEMAN SEBAYA, DAN FASILITAS PENDIDIKAN DENGAN KEPUTUSAN MAHASISWA DALAM MEMILIH PROGRAM STUDI PENDIDIKAN AKUNTANSI DI UNIVERSITAS SANATA DHARMA YOGYAKARTA

Wilhelmina Silvianing Putri  
Universitas Sanata Dharma  
2021

Penelitian ini bertujuan untuk mengetahui hubungan antara (1) biaya pendidikan dengan keputusan mahasiswa, (2) citra program studi dengan keputusan mahasiswa, (3) interaksi teman sebaya dengan keputusan mahasiswa, (4) fasilitas pendidikan dengan keputusan mahasiswa.

Penelitian ini merupakan penelitian kuantitatif yang dilaksanakan pada bulan Juni 2021. Populasi dalam penelitian ini adalah mahasiswa Program Studi Pendidikan Akuntansi Universitas Sanata Dharma angkatan 2017-2020 yang berjumlah 127 orang. Data penelitian dikumpulkan menggunakan kuesioner yang disebarluaskan melalui *google form*. Sebelum data diuji, dilakukan uji normalitas bivariate dan uji hipotesis dilakukan dengan uji korelasi *spearman Rank*.

Hasil penelitian menunjukkan bahwa: (1) terdapat hubungan antara biaya pendidikan dengan keputusan mahasiswa ( $r$  hitung sebesar 0,460 dengan nilai  $Sig$  (*2-tailed*) 0,000). (2) terdapat hubungan antara citra program studi dengan keputusan mahasiswa ( $r$  hitung sebesar 0,536 dengan nilai  $Sig$  (*2-tailed*) 0,000). (3) terdapat hubungan interaksi teman sebaya dengan keputusan mahasiswa ( $r$  hitung sebesar 0,359 dengan nilai  $Sig$  (*2-tailed*) 0,000). (4) tidak terdapat hubungan antara fasilitas pendidikan dengan keputusan mahasiswa ( $r$  hitung sebesar 0,146 dengan nilai  $Sig$  (*2-tailed*) 0,051).

**Kata Kunci:** Biaya Pendidikan, Citra Program Studi, Interaksi Teman Sebaya, Fasilitas Pendidikan, dan Keputusan Mahasiswa.

## ABSTRACT

**THE CORRELATION BETWEEN EDUCATION EXPENSES, STUDY PROGRAM IMAGE, PEER GROUP INTERACTIONS, AND EDUCATIONAL FACILITIES WITH STUDENTS' DECISIONS IN CHOOSING ACCOUNTING EDUCATION STUDY PROGRAM SANATA DHARMA UNIVERSITY**

Wilhelmina Silvianing Putri

*Sanata Dharma University*

2021

*This study aimed to determine the correlation between (1) education expenses with students' decisions, (2) study program image with students' decisions, (3) peer group interaction with students' decisions, and (4) educational facilities with students' decisions.*

*This type of research was a quantitative research conducted in June 2021. The population of this research were 127 students. The data were collected using questionnaires in Google form. Before the data were tested, the normality data was tested by the bi-variate and the hypothesis was tested by the Spearman's Correlation Rank.*

*The research result showed that (1) there was a significant correlation between education expenses with students' decisions, (Spearman's rho = 0,460, the value of sig. (2-tailed) = 0,000); (2) there was a significant correlation between study program image with students' decisions, (Spearman's rho = 0,536, the value of sig. (2-tailed) = 0,000); (3) there was a significant correlation between peer group interactions with students' decisions, (Spearman's rho = 0,359, the value of sig. (2-tailed) = 0,000); and (4) there was no significant correlation between educational facilities with students' decisions, (Spearman's rho = 0,146, the value of sig. (2-tailed) = 0,051).*

**Keywords:** Education Expenses, Study Program Image, Peer Group Interaction, Educational Facilities, and Students Decision.
