

## ABSTRAK

**Syarafina Rita Ilahi “Korelasi Kedisiplinan Belajar Siswa Selama Pandemi COVID-19 Terhadap Prestasi Belajar Fisika Siswa Kelas VIII SMP Negeri 2 Sapuran Wonosobo Tahun Ajaran 2020/2021” Program Studi Pendidikan Fisika Jurusan Matematika Dan Ilmu Pengetahuan Alam Fakultas Keguruan Dan Ilmu Pendidikan Universitas Sanata Sharma Yogyakarta 2021.**

Penelitian ini dilakukan di SMP Negeri 2 Sapuran Wonosobo pada kelas VIII. Tujuan dari penelitian ini adalah untuk mengetahui 1) disiplin belajar dimasa pandemi pada siswa kelas VIII SMP Negeri 2 Sapuran Wonosobo, 2) korelasi antara disiplin belajar terhadap hasil belajar siswa kelas 8 SMP Negeri 2 Sapuran Wonosobo.

Penelitian ini merupakan jenis penelitian kuantitatif jenis korelatif dengan analisis korelasi *Product Moment Pearson*. Subjek penelitian ini adalah semua siswa kelas VIII SMP Negeri 2 Sapuran Wonosobo tahun ajaran 2020/2021. Pengumpulan data menggunakan teknik kuisioner yang disebarluaskan melalui *whatsapp group* dengan variabel disiplin belajar dimasa pandemi COVID-19.

Hasil penelitian menunjukan bahwa: 1) Tingkat disiplin belajar selama pandemi COVID-19 dari siswa kelas VIII SMP Negeri 2 Sapuran Wonosobo berada pada keadaan yang cukup baik dengan nilai rata-rata 69,89 atau dibulatkan menjadi 70 dari 112. 2) Terdapat korelasi yang signifikan antara disiplin belajar dimasa pandemi COVID-19 terhadap prestasi belajar fisika siswa kelas VIII SMP Negeri 2 Sapuran Wonosobo hal ini berarti apabila disiplin belajar dimasa pandemi COVID-19 naik maka prestasi yang akan diperoleh siswa juga akan naik begitupula sebaliknya apabila disiplin belajar dimasa pandemi COVID-19 turun maka prestasi yang akan diperoleh siswa juga akan turun.

**Kata Kunci:** Disiplin, Pandemi COVID-19, dan Prestasi Belajar

## ABSTRACT

**Syarafina Rita Ilahi "The Correlation of Student Learning Discipline During the COVID-19 Pandemic Against Physics Learning Achievement of Class VIII Students at SMP Negeri 2 Sapuran Wonosobo for the Academic Year 2020/2021" Physics Education Study Program, Department of Mathematics and Natural Sciences Faculty of Teacher Training and Education, Sanata Dharma University Yogyakarta 2021.**

*This research was conducted at SMP Negeri 2 Sapuran Wonosobo in class VIII. The purpose of this study was to determine 1) the discipline of learning during the pandemic in class VIII students of SMP Negeri 2 Sapuran Wonosobo, 2) the correlation between learning disciplines and learning outcomes of grade 8 students of SMP Negeri 2 Sapuran Wonosobo.*

*This research is a quantitative type of correlative research with correlation analysis Product Moment Pearson. The subjects of this study were all eighth grade students of SMP Negeri 2 Sapuran Wonosobo for the 2020/2021 academic year. Data collection uses a questionnaire technique distributed through whatsapp groups with learning discipline variables during the COVID-19 pandemic.*

*The results showed that: 1) The level of learning discipline during the COVID-19 pandemic of class VIII SMP Negeri 2 Sapuran Wonosobo was in a fairly good condition with an average value of 69.89 or rounded up to 70 from 112. 2) significant There is a correlation There is a significant difference between learning discipline during the COVID-19 pandemic and the physics learning achievement of eighth grade students of SMP Negeri 2 Sapuran Wonosobo, this means that if the learning discipline during the COVID-19 pandemic increases, the achievement that will be obtained by students will also increase and vice versa if the learning discipline during the COVID-19 pandemic decreases, the achievement that will be obtained by students will also decrease.*

**Keywords:** Discipline, COVID-19 Pandemic and Learning Achievement
