*The Independent Curriculum comes with a number of new policies that are expected to provide flexibility and relevance in the learning process. This study aims to determine the implementation, obstacles, and efforts to overcome obstacles in the independent curriculum in grades I and IV of SD Muhammadiyah Kragan.*

*This research is a qualitative research with descriptive type. The subjects of this study were the principal, grade I teacher, grade IV teacher, administrative teacher, school committee, 3 grade I students, and 3 grade IV students of SD Muhammadiyah Kragan. The object of this research is the implementation of an independently changing independent curriculum. Data collection techniques through observation, interviews, and documentation studies. Data were analyzed using the Miles and Huberman model.*

*The results of this study indicate that: 1) The implementation of the independent curriculum changes in grades I and IV has been carried out quite well at SD Muhammadiyah Kragan in four activities which include intracurricular learning, extracurricular, P5, and school culture through the stages of planning, implementation, and evaluation. 2) Internal constraints include teachers' understanding, differences in students' abilities, and students' participation. While external constraints include teaching materials and infrastructure. 3) Efforts to overcome obstacles, namely SD Muhammadiyah Kragan creates an active, innovative, and relevant learning environment to the needs of students, and supports the development of teacher competencies in implementing the Independent Curriculum.*
